

programs, as well as the policies and procedures of the private health plans, should be integrated into every hospice's compliance program.

The OIG recognizes that the health care industry in this country, which reaches millions of beneficiaries and expends about a trillion dollars annually, is constantly evolving. The time is right for hospices to implement a strong voluntary health care compliance program. As stated throughout this guidance, compliance is a dynamic process that helps to ensure that hospices and other health care providers are better able to fulfill their commitment to ethical behavior, as well as meet the changes and challenges being imposed upon them by Congress and private insurers. Ultimately, it is OIG's hope that a voluntarily created compliance program will enable hospices to meet their goals, improve the quality of patient care, and substantially reduce fraud, waste and abuse, as well as the cost of health care to Federal, State and private health insurers.
